1 Introduction

The Wilpinjong Coal Mine (“the Mine”) is owned and operated by Wilpinjong Coal Pty Limited (WCPL), a wholly owned subsidiary of Peabody Energy Australia Pty Ltd (PEA).

The Mine is an existing open cut coal mining operation situated approximately 40 kilometres (km) north-east of Mudgee, near the Village of Wollar, within the Mid-Western Regional Local Government Area, in central New South Wales (NSW) (**Figure 1**). The mine produces thermal coal products which are transported by rail to domestic customers for use in electricity generation and to port for export. Open cut mining operations are undertaken 24 hours per day, seven days per week.

PEA and its subsidiaries, WCPL and Peabody Pastoral Holdings Pty Ltd, is a major landholder owning adjacent rural properties and land to the east and south-east of the mine. Land to the west of the mine is owned by adjacent mining companies, whilst the National Parks and Wildlife Service estate own significant land to the north and south-west of the Mine.

Private properties are located predominantly in and around the Wollar Village approximately 1.5 km to the east of the Mine and along Mogo Road to the north of the Mine.

The Mine originally operated under Project Approval (PA 05-0021) that was granted by the Minister for Planning under Part 3A of the NSW *Environmental Planning and Assessment Act 1979* (EP&A Act) on 1 February 2006.

The existing Environmental Management Strategy (this EMS) was developed in accordance with NSW Project Approval 05-0021.

On 24 April 2017, WCPL was granted Development Consent (SSD-6764) for the Wilpinjong Extension Project (WEP) that provides for the continued operation of the Mine at rates of up to 16 million tonnes per annum (Mtpa) of run-of-mine (ROM) out to 2033, and access to approximately 800 hectares (ha) of open cut extensions.

The Notice of Commencement to the DPE, as required by Condition 8, Schedule, 2 of SSD-6764 was confirmed by WCPL with its intention to commence the approved development on the 19 September 2017.

Development Consent (SSD-6764) has superseded the Project Approval (Project Approval 05-0021)¹.

This EMS has been prepared to satisfy the relevant conditions in Development Consent (SSD-6764). Where relevant, this EMS builds on the components of the existing/approved EMS, including previous feedback from government stakeholders and recommendations.

¹ PA05-0021 was surrendered on the 28 April 2020 as required by Condition 9, Schedule 2 of SSD-6764.

 Regional Location

1.1 Definitions

Table 1 provides a list of definitions for particular terms and acronyms used throughout this EMS.

Table 1 Explanation of Acronyms and Terms

Acronym / Phrase	Explanation
Continual Improvement	The process of enhancing the environmental management system to achieve improvements in overall environmental performance that are consistent with the Mine Environmental Policy.
Development Consent (SSD-6764)	SSD-6764 granted by the Minister for Planning under Part 4 of the EP&A Act on 24 April 2017.
DPE-Water	NSW DPE – Water (formally DPI-Water & DPIE -Water)
DPE	NSW Department of Planning and Environment (formally The NSW Department of Planning, Infrastructure and Environment or NSW DPIE, The NSW Department of Planning and Environment or NSW DP&E and The NSW Department of Planning and Infrastructure or NSW DP&I)
DPE-BCS	NSW DPE – Biodiversity, Conservation and Science (formally OEH)
NSW-RR	Regional NSW – Mining, Exploration and Geoscience Resources Regulator, formally NSW Department of Planning and Environment – Resources Regulator or NSW-RR
DoAWE	Department of Agriculture, Water and the Environment (formally Department of Environment and Energy or DoEE)
ECM	WCPL Environment and Community Manager.
EL	Exploration licences 6169 and 7091 granted by the Minister for Resources and Energy under the Mining Act 1992 on 3 March 2008 respectively. EL 6169 was renewed on 14 October 2013 and EL 7091 was renewed on 12 March 2013.
EMP	Environmental Management Plan.
ISO 14001	Environmental Management System (from ISO 14001).
EMS	WCPL's Environmental Management Strategy as required under Development Consent (SSD-6764)
EMS Audit	A systematic and documented verification process of obtaining and evaluating evidence to determine objectively whether the Mine EMS conforms to the EMS audit criteria set by WCPL and communication of the audit findings to senior management.
Environment	The surroundings in which the Mine operates, including air, water, noise, land, flora, fauna, natural resources, humans and their interaction.
Environmental Aspect	An element of Mine activities, products or services that can interact with the Environment.
Environmental Impact	Any change to the environment, whether adverse or beneficial, wholly or partially resulting from Mine activities, products or services.
Environmental Management Strategy (This EMS)	This document, which has been developed for compliance with and in accordance with Condition 1, Schedule 5 of the Development Consent (SSD-6764).
Environmental Objective	Environmental objectives arising from PEA's Environmental Policies or WCPL's Annual Plan that WCPL aims to achieve, and which is quantified where practicable.
Environmental Performance	Measurable results of the environmental management system, related to WCPL's control of its Environmental Aspects, based on Environmental Policies, Goals and Objectives.
Environmental Policies	PEA's Environmental Mission Policy and Environmental Land Restoration Policy.
Environmental Goals	Environmental goals arising from PEA's Environmental Policies or WCPL's Annual Plan that WCPL aims to achieve.
EPA	NSW Environment Protection Authority.
EPL	Environment Protection Licence 12425 granted by the EPA under the <i>Protection of the Environment Operations Act 1997</i> (POEO Act).
External Stakeholder	Individual or group concerned with or affected by the Environmental Performance of the Mine.
Incident	An incident that must be notified to an authority (immediately if required) in accordance with the EPL, Development Consent (SSD-6764) and Mining Lease.
Key Performance Indicators (KPIs)	detailed performance indicators, quantified where practicable, applicable to the Mine or parts thereof, that arise from the Environmental Objectives and that need to be set and met in order to achieve those objectives.
Material Harm to the Environment	Actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial.
MLA's	Mining Lease Application

Acronym / Phrase	Explanation
MWRC	Mid-Western Regional Council.
Near Hit	An incident that had the potential to cause environmental harm, but harm was avoided.
Non Compliance	A non-compliance of Impact Assessment Criteria that are specified in the various EMPs required under the Project Approval.
NOW	The NSW Office of Water, which is part of the NSW Department of Primary Industries.
OEH	NSW Office of Environment and Heritage
PEA	Peabody Energy Australia Pty Ltd, WCPL's parent company.
Personnel	All staff and contractors that perform work for/at the Mine.
Prevention of Pollution	Use of process, practices, materials or products that avoid, reduce or control pollution, which may include recycling, treatment, process changes, control mechanisms, efficient use of resources and materials substitution.
Private Receiver(s)	A Private Receiver(s) as identified in the Project Approval.
Project Approval	Project Approval (PA) (05-0021) granted by the Minister for Planning under Part 3A of the <i>Environmental Planning and Assessment Act 1979</i> (EP&A Act) on 1 February 2006 (as amended).
The Secretary	The Secretary of the NSW Department of Planning, Industry and Environment
WCPL	Wilpinjong Coal Pty Limited, a subsidiary of PEA.
WCP	The Wilpinjong Coal Project as described in the WCP EIS (WCPL, 2006)
WEP	The Wilpinjong Extension Project as described in the WEP EIS (WCPL, 2016)
WCP EIS	The Wilpinjong Coal Project Environmental Impact Statement (WCPL, 2006).
WEP EIS	The Wilpinjong Extension Project Environmental Impact Statement (WCPL, 2016).

1.2 Purpose

This EMS has been developed to minimise environmental impacts from the Mine by providing the strategic framework for environmental management across the Mine. This EMS is formulated from the requirements in Development Consent (SSD-6764) and sets out to:

- Provide a strategic framework for the environmental management of the Mine;
- Identify the statutory approvals that apply to the Mine;
- Describe the role, responsibility, authority and accountability of all key personnel involved in the environmental management of the Mine;
- Describe the procedures that would be implemented to:
 - Keep the local community and relevant agencies informed about the operation and environmental performance of the Mine;
 - Receive, handle, respond to, and record complaints;
 - Resolve any disputes that may arise during the course of the project;
 - Respond to any non-compliance; and
 - Respond to emergencies.
- Include a clear plan depicting all the monitoring to be carried out in relation to the project; and
- Include a clear plan depicting all the monitoring required to be carried out.

This EMS also sets out the procedures for periodic reviews, auditing and where necessary, revision of this EMS, so that it is maintained to reflect current mining operations to the satisfaction of the Secretary. A copy of this EMS will be made available for viewing to members of the public at the Mine and on the website.

1.3 Scope

This EMS establishes the overarching framework for the monitoring and environmental management of activities undertaken at the Mine. This EMS incorporates the principles of continuous improvement and is consistent with the five fundamental elements of *ISO 14001: Environmental Management Systems*, as displayed within **Figure 2**.

This EMS relates to works and activities undertaken within:

- The Development Consent (SSD-67-64) area, Mining Leases (MLs) which includes open cut mining areas, a Coal Handling and Preparation Plant (CHPP), raw and product coal stockpiles, a rail loop and rail loader, and office and workshop support facilities (**Figure 3**); and
- Exploration Licence areas 6169 and 7091.

Figure 2 WCPL Environmental Management Principles

1.4 Consultation

This EMS has been prepared in accordance with the relevant Conditions of Development Consent (SSD-6764). Consultation specific to Environmental Management Plans (EMPs), as required under Development Consent (SSD-6764), is recorded within each relevant EMP and outlined in **Section 3.8**. Copies of correspondence relevant to this EMS are included in **Appendix 4**.

On the 8 August 2019, WCPL commenced consultation with the DPE to request a minor variation to increase the disturbance footprint and open cut boundary to Pit 8, arising from refinement to the Pit 8 detailed design. On the 23 August 2019, WCPL received approval from the DPE that the proposed minor changes to the footprint area of Pit 8 are generally in accordance with the WEP and project approval. Accordingly, WCPL have updated all relevant management plans required by SSD-6764 to reflect this change, as discussed with the DPE.

During May 2021, WCPL sought consultation with the DPE to request a minor variation to increase the disturbance footprint and open cut boundary of Pit 6, arising from refinement to the detailed design allowing access to additional coal reserves at the south-western boundary of Pit 6. On the 07 June 2021, WCPL received approval from the DPE the proposed minor changes to the footprint area of Pit 6 is generally in general accordance with the WEP and project approval. Noting that minor changes to the disturbance footprint were contemplated following detailed design. Accordingly, WCPL have updated all relevant management plans required by SSD-6764 to reflect this change, as required by the DPE.

2 Peabody's Environmental Policy

We commit to safety and health as a way of life. In addition, we take responsibility for minimising impacts on the environment, providing benefits to our communities and restoring the land for future generations.

Our vision is to operate safe, healthy and environmentally responsible workplaces that are incident free. Safety and health as well as environmental sustainability are core Peabody values and are integrated into all areas of our business. Our goal is to eliminate all workplace incidents, including injuries and occupational illnesses, and mitigate environmental impacts.

The following governing principles apply to our employees, contractors, visitors and vendors at our sites, or any location where Peabody work activities take place and includes all phases of the mining life cycle:

- Management has the overall accountability for safety, health and environmental management, the promotion of risk management, and the sharing of knowledge across the organization;
- Everyone is responsible for their own safety and health, preparation for and fitness for work, as well as looking out for their co-workers and protecting the environment;
- Everyone will be provided training and equipment to perform their jobs in a safe, healthy and environmentally responsible manner;
- Everyone has the authority to stop and challenge activities that could result in injury or unauthorized environmental impacts;
- Everyone must comply with established safety, health and environmental requirements (including lifesaving / cardinal rules), laws and regulations;
- Open, honest and effective incident investigation, followed by corrective actions that address the issues identified is essential;
- Risks and opportunities are identified and monitored to continuously improve safety, health, environmental stewardship, emissions reduction, and resource management;
- Safety, health and environmental objectives will be developed, and applicable performance indicators appropriately reported;
- Areas disturbed by mining will be progressively rehabilitated/reclaimed, monitored and maintained to help ensure desired post-mine land use, landform and environmental outcomes are achieved;
- Successes will be celebrated, and desirable behaviors recognized and reinforced.

3 Planning

3.1 Statutory Requirements

This EMS has been prepared to fulfil the requirements of the Development Consent (SSD-6764), and Environment Protection Licence (EPL) 12425 as shown in **Appendix 2. Table 2** summarises WCPL’s current statutory approvals.

Table 2: WCPL’s Current Statutory Approvals

Approval/Licence No.	Description	Expiry Date	Agency
SSD-6764	Development Consent	28 years from commencement of Project Approval (i.e. 2033)	DPE
EPL 12425	EPL	Until the licence is surrendered, suspended or revoked. The licence is subject to review every 3 years	EPA
ML1573	Mining Lease	February 2027	NSW-RR
ML1779	Mining Lease	December 2039	NSW-RR
ML1795	Mining Lease	September 2040	NSW-RR

PA05-0021 was surrendered on 28 April 2020 in accordance with Condition 9, Schedule 2 of Development Consent SSD-6764.

In addition to meeting the specific performance criteria established within Development Consent (SSD-6764), WCPL will implement all reasonable and feasible measures to prevent and/or minimise any material harm to the environment that may result from the construction, operation, or rehabilitation of the project.

3.1.1 Limits of Consent

WCPL may carry out mining operations on site until the 31 December 2033. WCPL must not extract more than 16 million tonnes of ROM coal from the site in a calendar year. WCPL must ensure that:

- All product coal is transported from the site by rail;
- No more than 10 laden trains leave the site on any one day; and
- Not more than 6 laden trains leave the site per day on average when calculated over any calendar year.

3.1.2 Operation of Plant and Equipment

WCPL must ensure that all plant and equipment used on site, or to monitor the performance of the development is:

- Maintained in a proper and efficient condition; and
- Operated in a proper and efficient manner.

3.1.3 Protection of Public Infrastructure

Unless WCPL and the applicable authority agree otherwise, WCPL must:

- Repair, or pay the full costs associated with repairing, any public infrastructure that is damaged by the development; and
- Relocate, or pay the full costs associated with relocating, any public infrastructure that needs to be relocated as a result of the development.

Note: This condition does not apply to any to damage to roads caused as a result of general road usage.

3.2 Specific Development Consent Requirements

This EMS has been prepared in accordance with Condition 1, Schedule 5 of Development Consent (SSD-6764). **Table 3** presents the EMS specific requirements and indicates where they are addressed within this EMS. Other statutory and Development Consent (SSD-6764) requirements are shown in **Appendix 1**.

Table 3 Development Consent EMS Requirements

Development Consent (SSD-6764) Condition	EMS Section
Environmental Management Strategy	
1. The Applicant must prepare an Environmental Management Strategy for the development to the satisfaction of the Secretary, and carry out the development in accordance with this strategy. The strategy must:	This EMS
(a) be submitted to the Secretary for approval prior to carrying out any development under this consent;	Section 1.2
(b) provide the strategic framework for environmental management of the development;	This EMS
(c) identify the statutory approvals that apply to the development;	Section 3.0 & Appendix 1 & 2
(d) describe the role, responsibility, authority and accountability of all key personnel involved in the environmental management of the development;	Section 7
(e) describe the procedures that would be implemented to:	Section 6.0
• keep the local community and relevant agencies informed about the operation and environmental performance of the development;	Section 4.0
• receive, handle, respond to, and record complaints;	Section 4.0
• resolve any disputes that may arise during the course of the development;	Section 4.0
• respond to any non-compliance;	Section 4.0
• respond to emergencies; and	
(f) include:	Section 3.10
• copies of any strategies, plans and programs approved under the conditions of this consent; and	Appendix 3
• a clear plan depicting all the monitoring required to be carried out under the conditions of this consent.	

3.3 Development Consent General Requirements

Condition 3, Schedule 5 of Development Consent (SSD-6764), outlines general management plan requirements that are applicable to the preparation of this EMS. **Table 4** presents these requirements and indicates where they are addressed within this Strategy.

Table 4 General Management Plan Requirements

Development Consent (SSD-6764) Condition	EMS Section
Management Plan Requirements	
3. The Applicant must ensure that the management plans required under this consent are prepared in accordance with any relevant guidelines, and include:	Section 2.0
(a) detailed baseline data;	Section 4.0
(b) a description of:	
• the relevant statutory requirements (including any relevant approval, licence or lease conditions);	Section 3.1 & Appendix 1 & 2
• any relevant limits or performance measures/criteria;	Section 4.0
• the specific performance indicators that are proposed to be used to judge the performance of, or guide the implementation of, the development or any management measures;	Section 4.0
(c) a description of the measures that would be implemented to comply with the relevant statutory requirements, limits, or performance measures/criteria;	Section 4.0
(d) a program to monitor and report on the:	

Development Consent (SSD-6764) Condition	EMS Section
<ul style="list-style-type: none"> impacts and environmental performance of the development; 	Section 4.0 & Appendix 3
<ul style="list-style-type: none"> effectiveness of any management measures (see c above); 	Section 6.0
(e) a contingency plan to manage any unpredicted impacts and their consequences;	Section 4.0
(f) a program to investigate and implement ways to improve the environmental performance of the development over time;	Sections 5.0 and 6.0
(g) a protocol for managing and reporting any:	Section 6.0
<ul style="list-style-type: none"> incidents 	Section 4.0
<ul style="list-style-type: none"> complaints 	Section 4.0
<ul style="list-style-type: none"> non-compliances with statutory requirements; and 	Section 4.0
<ul style="list-style-type: none"> exceedances of the criteria and/or performance criteria; and 	Section 4.0
(h) a protocol for periodic review of the plan.	Section 5.0

3.4 Legal Requirements and Compliance

The planning process requires WCPL to identify, have access to, understand and demonstrate compliance with relevant environmental legislation and other requirements which WCPL subscribes to or that are related to its environmental aspects applicable to the Mine.

WCPL subscribes to Environmental Essentials, a web-based platform that provides current updates to changes in applicable Commonwealth and State legislation and compliance registers against WCPL's Development Consent and management plans obligations.

In addition, WCPL utilises SAP an environment, health and safety incident management system, which enables environmental incidents to be tracked and actioned. WCPL also monitors compliance with its statutory requirements including the management and maintenance of documents, records and data.

Critical statutory requirements that apply to WCPL are the various approvals issued under State and Commonwealth legislation. Legal and other requirements considered in the planning process include:

- Environmental legislation, regulations and planning policies;
- Mining leases and approvals;
- Exploration leases;
- Development consents and development approvals;
- Environment Protection Licence (EPL) 12425;
- Other licences and permits (e.g. Radiation, Dangerous Goods, water licences);
- Voluntary Conservation Agreement as maintained with NSW Minister for Environment;
- Voluntary Planning Agreement with Mid-Western Regional Council (MWRC);
- Mining Operations Plan (MOP²);
- Native Title Agreement;
- Environmental Assessments, and;
- AS/NZS ISO 14001:2004, Environmental management systems

3.5 Risk and Change Management

Risk identification at the Mine is undertaken in accordance with WCPL's Risk Management Plan. WCPL maintains a site Risk Register which records all significant site hazards and calls for their respective risks to be assessed, allowing objective prioritisation and focus according to the level of risk. The Risk Register forms a component of the Peabody Incident Management System (PIMS) database.

² To be superseded by RMP (refer to **Section 3.10.1**)

Change management at the Mine is undertaken in accordance with WCPL's Change Management Procedure. This procedure describes the processes for managing changes in order that the potential for injury to people, or damage to physical assets and the environment, is eliminated or minimised to acceptable levels.

3.6 Environmental Aspects and Impacts

Identification of the Mine's environmental aspects and impacts is an integral part of the EMS. An environment and community broad brush risk assessment (Environment and Community Risk Register) is maintained and reviewed annually within the EMS. Ongoing job specific risk assessments are also regularly undertaken in accordance with the Risk Management Plan. Where necessary, results from these are incorporated into the Environment and Community Risk Register.

Where appropriate, the results of the Environment and Community Risk Register and ongoing risk reviews are incorporated into the mine planning and maintenance programmes, environmental objectives and targets, management programmes and work procedures.

3.6.1 Ground Disturbance Permit

Risk associated with ground disturbance is managed using the Ground Disturbance Permit (GDP)³. A GDP is required to be completed prior to the commencement of new projects or activities requiring ground disturbance within the Mine site. Where required, a site-specific erosion and sediment control plan is required to be developed as part of this process. The GDP must be approved by the ECM (or delegate) prior to works commencing. Ground disturbing activities are not authorised to proceed without an approved GDP. Pre-clearance surveys will be undertaken as required, in accordance with the Biodiversity Management Plan (BMP).

3.7 Annual Business Plan – Goals, Objectives and KPIs

WCPL's Annual Business Plan includes goals and objectives for environmental management and stakeholder engagement. These goals and objectives take into consideration:

- Legal and other requirements;
- Significant environmental aspects;
- Stakeholder views;
- Technical capability; and
- Other company requirements including Peabody's Environmental Policy (**Section 2**).

Goals and objectives are progressively achieved through implementation of the Environmental Management Plans (EMPs) and Mine procedures. Key performance indicators (KPIs) are developed to measure success against WCPL's environmental goals and objectives. Environmental goals, objectives and KPIs are reviewed and updated on an annual basis for continual improvement. They form an integral part of this EMS and reflect WCPL's commitment to continual improvement.

3.8 Life of Mine Plan

The Life of Mine (LOM) Plan provides WCPL a strategic planning instrument that details the long-term mining activities that are proposed for the Mine. The LOM Plan is an internal document that is primarily orientated to mining operations and provides an indicative timeline to when these activities are to be undertaken.

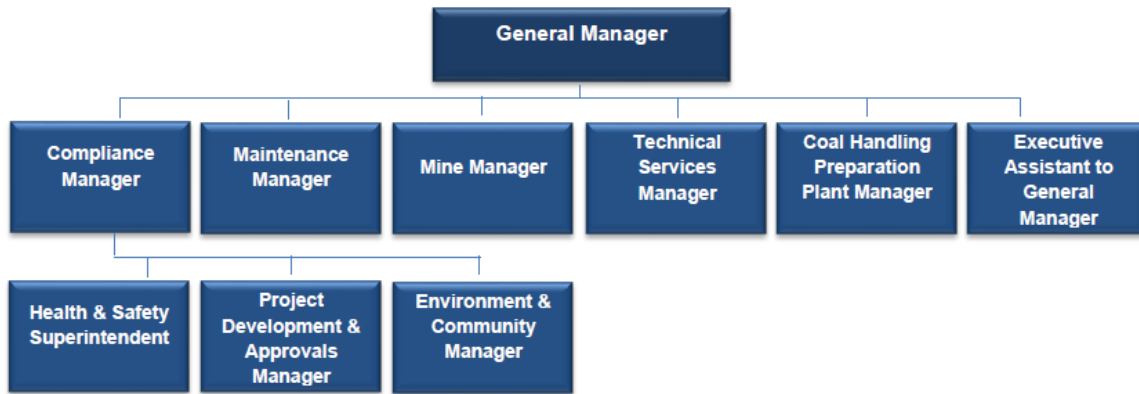

As a strategic planning document, the LOM Plan is a critical input to defining the environmental works and activities to be undertaken at the site (including the timeframes for implementing these works).

3.9 Organisational Chart

Figure 4 shows the organisational structure of WCPL's Senior Leadership Team.

³ Further information regarding the GDP process is provided in the BMP.

Figure 4 WCPL Senior Organisational Chart

3.10 Environmental Management System Structure

The components of this EMS include:

- Environmental Management Strategy (this document);
- Specific and separate EMPs which provide details on the management of environmental aspects and impacts (including environmental obligations and performance targets) (**Table 5**);
- Site document control system including work procedures, training records, monitoring results, stakeholder engagement register, community complaints, environmental forms, inspection and audit reports; and
- Management roles and accountabilities of key personnel.

Table 5 EMPs Required by Development Consent (SSD67-64)

3.10.1 Rehabilitation Management Plan

A Rehabilitation Management Plan (RMP) has been prepared by WCPL in accordance with the NSW Resources Regulator (NSW RR) *Form and Way-Rehabilitation Management Plan for Large Mines* (NSW RR, July2021). The RMP has been developed to satisfy the conditions of Mining Leases (ML) ML1573, ML 1779 and ML1795 and Condition 64, Schedule 3 of Development Consent (SSD-6764) requiring the development of an RMP.

The Mining Operations Plan (MOP) 2021-2022 was originally prepared to satisfy the requirements for a MOP under ML conditions and rehabilitation requirements under SSD-6764. The MOP will prevail for rehabilitation requirements until the expiry of the transitional period on 2 July 2022 (subject to the RMP approval), at which point the MOP will be superseded by the RMP and supporting the Annual Rehabilitation Report and Forward Program (ARRFP).

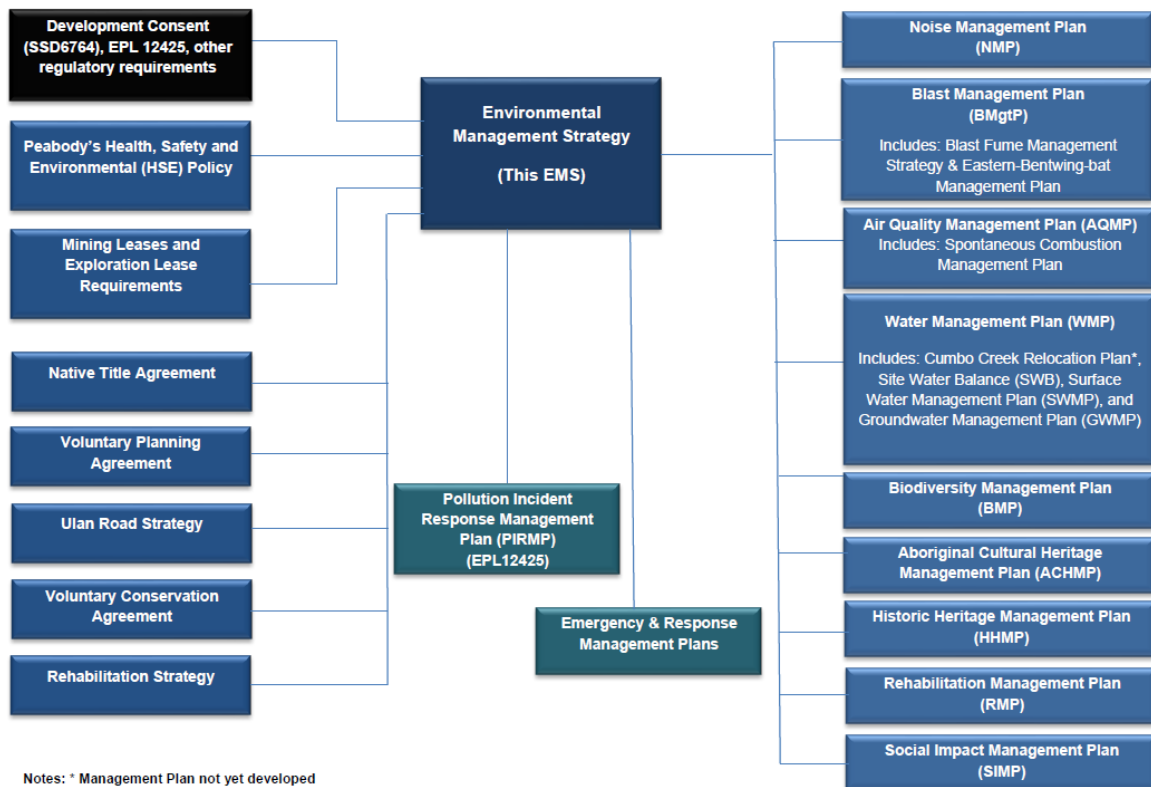

3.10.2 EMS Structure

All EMPs have been developed in accordance with the relevant conditions of Development Consent (SSD-6764), EPL 12425 and other approvals, licences, permits and agreements (as required). This EMS applies to all employees, contractors and others attending the site, whilst also guiding WCPL's relationship with the communities and minimising the impact of WCPL's operations on the environment.

This EMS has been developed as an umbrella document to provide guidance to activities undertaken at the Mine for the development, implementation and continual assessment and review of its environmental management system.

An overview of this EMS structure is illustrated in **Figure 5**. This EMS remains a public document and provides the community with information relating to environmental management at the Mine and is subject to audit by WCPL and the respective government agencies responsible for monitoring environmental performance at the Mine.

Figure 5 WCPL EMS Structure

3.11 Mine Closure Planning

Peabody have developed a standard for mine closure planning, known as Standard for Closure Planning and Reclamation (PC-ENV-STD-EN01) as part of a Peabody's initiative to undertake life of mine closure planning for mining operations. The Mine is not planned for closure until 2033. In accordance with WCPL mining leases any disturbance resulting from the activities carried out under this mining lease must be rehabilitated to the satisfaction of the Minister.

The RMP addresses all aspects of rehabilitation including mine closure, final landform and final land use. The RMP has been prepared to address the requirements of Development Consent (SSD-6764). The strategies and planning set out in the RMP, with respect to mine closure, reflect the current early stages of mine development and will be reviewed in consultation with all relevant government and community stakeholders during the life of the mine as strategies and planning mature and develop further. This will allow the RMP to be used as a dynamic document that can be continually improved over the life of the Mine. As required by Peabody's mine closure standard, WCPL will prepare its mine closure plan during the RMP term.

3.12 Ulan Road Strategy

In 2011 a strategy was developed by Arrb Group Ltd for the upgrade and ongoing maintenance of the Ulan Road, between Mudgee and the entrance to Ulan Coal No. 3 Underground Mine over the next 21 years (the "Ulan Road Strategy") (Arrb Group Ltd, 2011).

This strategy was developed for Ulan Coal Mines Pty Limited (UCMPL), in conjunction with WCPL and Moolarben Coal Operations Pty Ltd (MCO) and submitted to DPE for approval in December 2011. The Ulan Road Strategy was amended by the Secretary of DPE in a letter dated 25 May 2013. As required, WCPL will:

- Work with MWRC and the owners of MCO and UCML to develop a detailed plan for the implementation of the strategy;
- Make financial contributions⁴ towards the implementation of the detailed plan, in accordance with the requirements of the detailed plan;
- Make contributions towards the implementation of the Ulan Road Strategy (ARRB Group, December 2011). If there is any dispute about the implementation of the strategy, then any of the parties involved⁵ may refer the matter to the Secretary for resolution; and
- Prior to carrying out any development under Development Consent (SSD-6764), the Applicant shall write to the owners of the residences that are entitled to additional road noise mitigation works under the Ulan Road Strategy (ARRB Group, December 2011) who have not sought these mitigation measures yet, and remind them that they are entitled to additional road noise mitigation works under the strategy.

All fifteen properties within the zone for noise mitigation measures have had their respective noise mitigation measures completed. The last remaining properties to finalise noise agreements and complete their noise mitigation measures occurred in April and July 2020. One property has declined noise mitigation works and two properties are outside the zone for noise mitigation measures.

All associated works regarding the road capital upgrades for Ulan Road and Cope Road in line with the Strategy and managed by MWRC have been 100% completed, with the maintenance period now triggered in accordance with the Strategy (maintenance period ongoing for the Wilpinjong Coal Project).

Updates of the Ulan Road Strategy including the noise attenuation works are provided in the Annual Review.

⁴ WCPL's financial contributions to the Ulan Road upgrades are further detailed in Appendix 9 of PA 05-0021.

⁵ WCPL, UCML, MCO or MWRC

3.13 Cooperation with Adjacent Mines

WCPL will continue to work cooperatively with MCO and UCML to minimise the cumulative impacts of the Mine on the surrounding area. WCPL will coordinate shift changes on site with the shift changes of MCO and UCML to minimise the potential cumulative traffic impacts of shift changes of the three mines. Previously WCPL have altered its shift changes in consultation with MCO and UCML to the satisfaction of the Secretary.

WCPL will coordinate blasting activities in conjunction with MCO and UCML to minimise cumulative blasting impacts on the local community. The three mines have developed a Blasting Notification Protocol (UCML, 2011) to assist in the coordination of blasting activities.

WCPL has a data sharing agreement with MCO and UCML. This agreement allows WCPL access to data from selected monitoring equipment and weather stations owned and operated by these other mines. This data can be used to assist in the investigation of incidents and in general environmental management onsite.

3.14 Biodiversity Offsets Strategy and Voluntary Conservation Agreement

In 2012, WCPL entered into a Voluntary Conservation Agreement (VCA) with the NSW Minister for the Environment, for four parcels of land surrounding ML 1573 (**Figure 6**). These parcels, known as Enhancement and Conservation Areas (ECAs) A, B and C, comprise approximately 480 hectares of land, for conservation purposes.

The Biodiversity Offset Strategy comprises a package of Biodiversity Offset Areas (BOAs) that will be set aside for conservation and managed in perpetuity, and WCPL's rehabilitation strategy. In addition, the Biodiversity Offset Strategy includes a number of ECAs and residual Regeneration Areas associated with the original Wilpinjong Coal Project that will strengthen the linkages between the woodland rehabilitation areas and the Goulburn River National Park and Munghorn Gap Nature Reserve. The Biodiversity Offset Strategy will also assist in the faunal recolonisation of Project Rehabilitation Areas and residual Regeneration Areas.

The Biobanking Assessment Methodology 2014 (OEH, 2014c) and Credit Calculator were used to assess the biodiversity values of five land-based Biodiversity Offset Areas. **Figure 6** shows the location of BOAs relative to the Project. These BOAs are located on land owned by Peabody.

The BOAs are strategically located next to the Goulburn River National Park and Munghorn Gap Nature Reserve, with the potential to increase the extent of these existing protected areas. The Biodiversity Offset Areas total 1,100 ha in size, comprising approximately 996 ha of native vegetation (**Figure 6**).

WCPL have prepared a Biodiversity Management Plan (BMP), in accordance with the relevant conditions Development Consent (SSD67-64). The BMP includes management measures, rehabilitation criteria and a monitoring program for BOAs, as well as for the ECAs, rehabilitation areas and residual Regeneration Areas.

All land within Biodiversity Offset Areas D and E were transferred to the National Parks Estate on the 13 January 2016.

In 2017, WCPL commenced consultation with NSW National Parks and Wildlife Services (NPWS) with respect to the transfer of Biodiversity Offset Areas 1-5 in accordance with Schedule 3, Conditions 32 and 35 of Development Consent (SSD-6764).

WCPL has sought an extension in time from the Secretary to complete the transfer before the 29 July 2022 due to wet weather delays for the completion of on-ground works required to meet the standards agreed with NPWS prior to transfer, and that WCPL is awaiting approval of necessary land subdivisions to enable the transfer to occur.

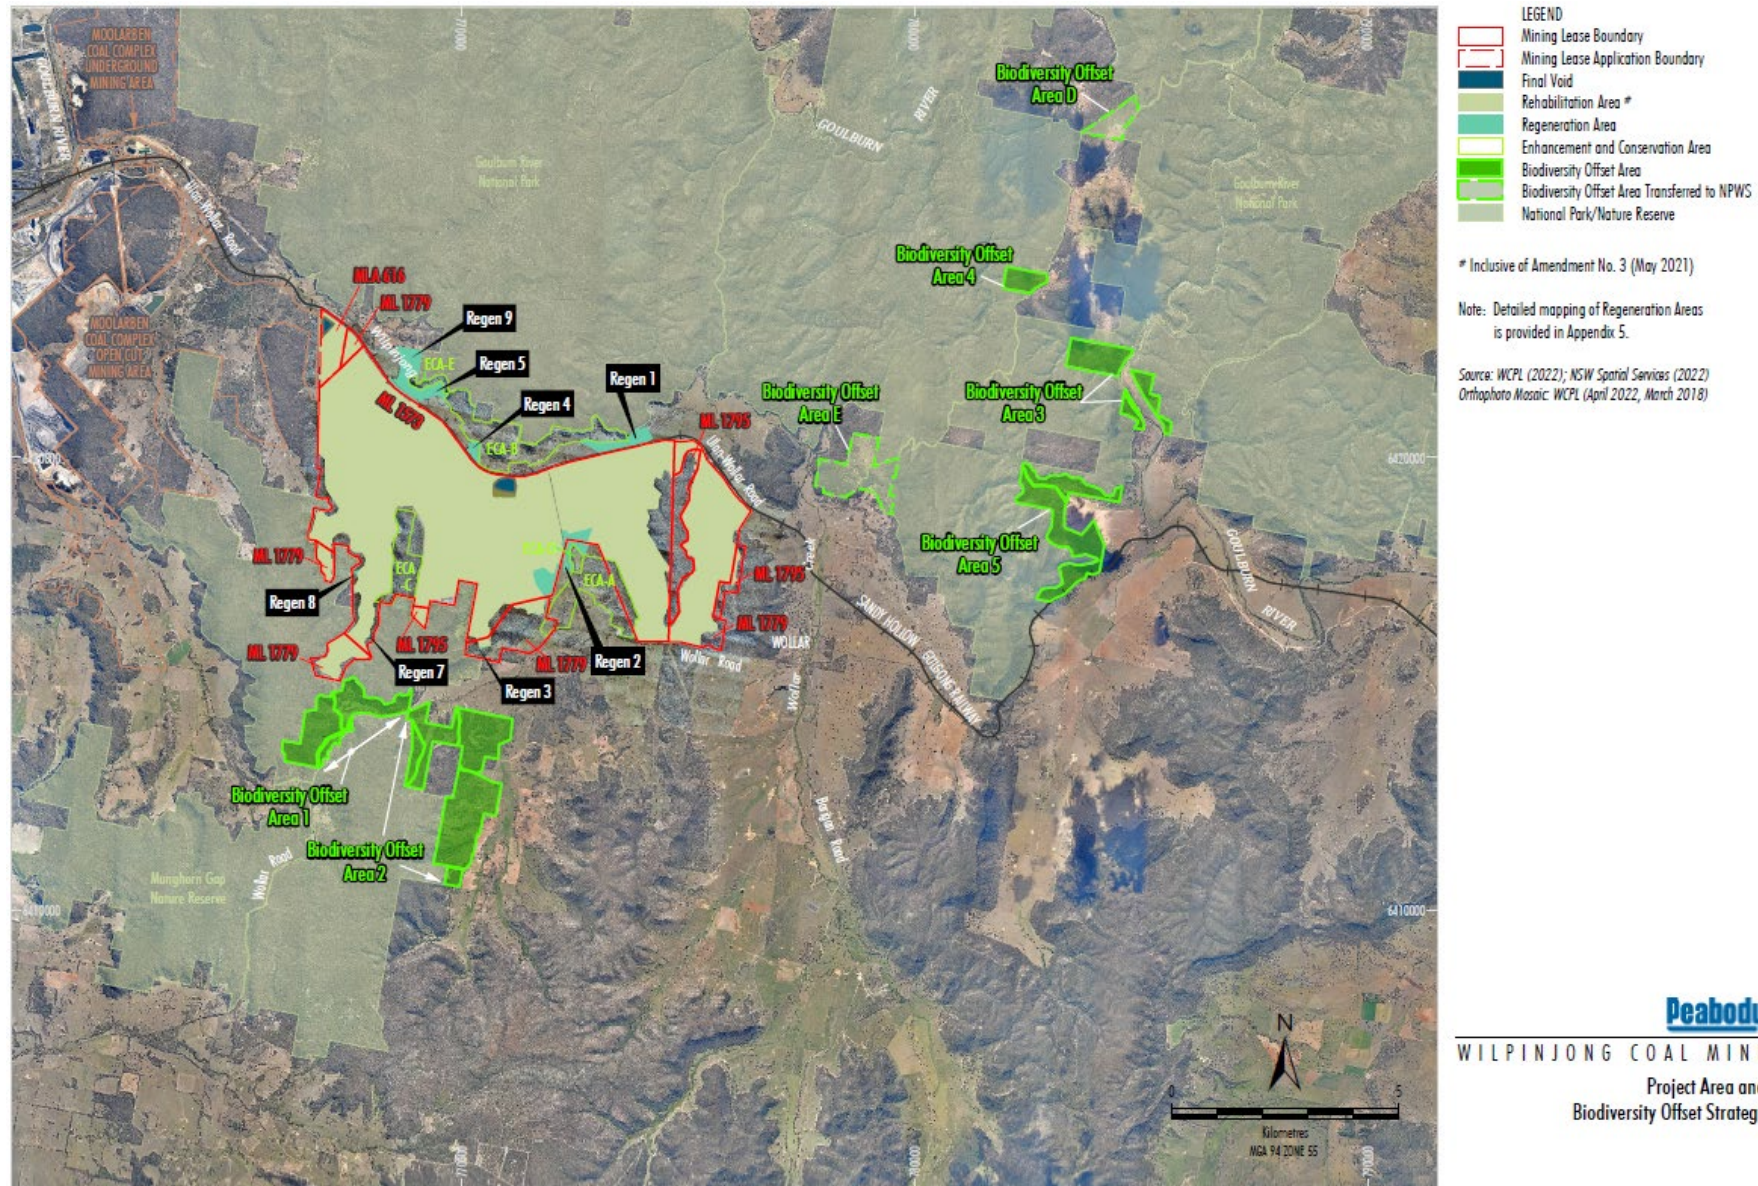

Subject to the completion of this transfer, land management activities of the BOAs 1-5 as described in the BMP, will no longer be required.

In accordance with Schedule 3, Condition 44 of the Development Consent, a Conservation Bond was lodged with the Department within 2 years of commencing development, unless otherwise agreed to by the Secretary. The Conservation Bond was accepted by the DPE on 5 October 2017.

The Conservation Bond will only apply to the ECAs and Biodiversity Offset Areas 1-5, however, it is noted existing bonds paid for the ECAs will remain current.

The sum of the bond will be calculated to cover management measures prescribed within this Management Plan and include (for example) staff costs, fencing, fire management, weed management, feral animal control, seed collection, replanting/revegetation, monitoring, auditing and reporting until the Biodiversity Offset Areas are transferred to NPWS as described above.

Figure 6 Biodiversity Offset Areas and Enhancement and Conservation Areas

WL-12-11_BMP_2022_2014

3.15 Native Title Agreement

Through the operation of the Federal *Native Title Act 1993*, a Native Title Agreement (NTA) is maintained with the North Eastern Wiradjuri Company Ltd (NEWCO) Native Title Claimants over ML 1573. The Government Party Deed ("the Deed") represents an agreement for the purposes of s.31 (1) (b) of the *Native Title Act 1993* and was validly lodged with the National Native Title Tribunal on 12 December 2005.

The implementation of the NTA is through the operation of an "Ancillary Deed" which was entered into by the grantee party (WCPL) and the claimants (NEWCO). WCPL will continue to implement arrangements detailed in the NTA through the operation of the Aboriginal Cultural Heritage Management Plan (ACHMP) and, external to this ACHMP, in consultation with NEWCO.

The WEP extended into three new Mining Lease Application (MLA) areas within both EL6169 and EL7091. Two MLA's including MLA510 and MLA515 have now been granted approval and converted to ML1779 and ML1795 respectively. MLA 510 did not trigger the Native Title process. MLA515 is subject to Native Title negotiations with the relevant Native Title Claimants' Group. The third MLA is not required in the short term.

3.16 Voluntary Planning Agreement

In 2006 WCPL and MWRC signed the Wilpinjong Coal Project Planning Agreement. This agreement included a lump sum payment prior to the first shipment of coal from the Mine and monetary contributions for community infrastructure and road maintenance. In 2011 WCPL signed a Voluntary Planning Agreement (VPA) with MWRC in accordance with PA 05-0021 and Part 4 Division 6 of the EP&A Act 1979.

Within 6 months of the commencement of development under this Development Consent (SSD-6764), unless the Secretary agrees otherwise, WCPL shall amend the current planning agreement with MWRC under Division 6 of Part 4 of the EP&A Act to reflect the terms outlined in Appendix 4 (see below) of Development Consent (SSD-6764).

The annual payments for each payment year will be;

- A community infrastructure contribution
- A road maintenance contribution
- A social amenity/infrastructure contribution

The annual social amenity/infrastructure contribution is determined by the following formulas:

- For payment years up to and including 2027:
Annual Payment (4) = (W-100) x (\$12,000/20)
- For payment years on and from 2028
Annual Payment (\$) = W x (\$12,000/20)

Where 'W' is the total number of permanent employees and permanent contractors at the Wilpinjong Coal Project as determined by Wilpinjong (acting reasonably) on 28 February in any given year. In addition to financial contributions, Wilpinjong must:

- Provide access to the ablution facilities at the Wollar General Store for public use during and beyond the store opening hours;
- Provide cleaning services to the Wollar General Store ablution facilities; and
- Provided continued ground keeping of the vacant and public land within Wollar Village, including church grounds, park and town entrances.

Council agrees to provide Wilpinjong with access to the maintenance equipment as required by Wilpinjong to carry out its obligations under clause (iii).

Council will be responsible for repairs and upgrades to the maintenance equipment as and when required to enable Wilpinjong to fulfil its obligations under clause (iii).

WCPL are also co-funding the implementation of the Ulan Road Strategy with UCML, MCO and MWRC (**Section 3.12**).

If a party to the VPA is dissatisfied with the conduct of the other party under the VPA, that party must notify the other and if the dispute cannot be resolved by discussions between the parties it shall be referred to the Secretary who will establish a mechanism whereby the dispute can be resolved.

3.17 Consultation and Communication

3.17.1 Internal Communications

Various forms of communications are undertaken (as required) to inform the Mine's management, employees, contractors and other relevant stakeholders of their requirements under the Strategy, including but not limited to the following:

- Induction Training;
- Pre-shift Talks;
- Crew Talks;
- Management Meetings;
- Safety Alerts;
- Tool Box Talks and Newsletters;
- Work Permits;
- Emails; and
- Safety Interactions.

3.17.2 External Communications

Communications between WCPL and external stakeholders include, but are not limited to:

- Regular meetings and consultation with relevant Government agencies;
- Local communities (including Newsletters and 'Have a Chat' meetings);
- Providing information on the Peabody website:
- <https://www.peabodyenergy.com/Operations/Australia-Mining/New-South-Wales-Mining/Wilpinjong-Mine/Approvals,-Plans-Reports>
- The Community Consultative Committee (CCC)⁶;
- Aboriginal Heritage Meetings; and
- Neighbouring coal mining operations (e.g. UCML and MCO).

Contact details for key personnel responsible for environmental management at the Mine are in **Table 6**.

Table 6 Mine Contact Details

Name	Position	Contact Details
Jacques du Toit	General Manager	Email: JduToit@peabodyenergy.com
Christian Oosthuizen	Compliance Manager	Email: COosthuizen@peabodyenergy.com
Kieren Bennetts	Environment & Community Manager	Email: kbennetts@peabodyenergy.com
Clark Potter	Senior Environmental Advisor	Email: cpotter@peabodyenergy.com

The street and contact telephone numbers for the Mine are as follows: 1434 Ulan-Wollar Road, Wollar NSW 2850; ph (02) 6370 2500

⁶ As required by Condition 7, Schedule 5 of Development Consent (SSD-6764) WCPL has established a Community Consultative Committee (CCC). This CCC is operated in accordance with the *Guidelines for Establishing and Operating Community Consultative Committees for Mining Projects* (Department of Planning, 2007, or its latest version).

4 Implementation and Monitoring

Table 7 summarises WCPL's implementation and monitoring processes for the EMS on site and identifies where these processes are also included in individual EMPs.

Table 7 Implementation and Monitoring Processes for the EMS

Element	Aspect	Commitment	Reference	EMP Section
Policy and Commitment	Environmental Policies	Peabody maintains an 'Environmental Policy' to guide the strategic environmental direction for the Wilpinjong Mine.	Environmental Management Strategy	2.0
Planning	Life of Mine Planning	WCPL maintain an RMP which details the rehabilitation planning objectives and commitments for the Mine.	RMP	All
	Hazard Identification	<p>WCPL maintains a GDP process as a risk management tool to prevent unauthorised disturbance or disturbance to sensitive ecological values and cultural heritage.</p> <p>WCPL maintains BBRA and associated risk register.</p> <p>The GDP will be completed by the relevant Project Manager and requires sign off by an Environmental Representative prior to any disturbance on undisturbed land.</p>	<p>Environmental Management Strategy</p> <p>Biodiversity Management Plan</p>	3.5 & 3.6.1 7.8
	Baseline Data	The preparation of WCPL's environmental management plans (EMP) considers, where applicable, historical data relative to each specific EMP.	EMPs	3.0
Implementation	Training and Awareness	WCPL will provide adequate environmental training and awareness to all employees and contractors working at the Mine.	Noise Management Plan	11.0
			Blast Management Plan	5.2.2, 5.3.2 & 11.0
			Air Quality Management Plan	11.0
			Water Management Plan	5.0
			Aboriginal Cultural Heritage Management Plan	3.4, 5.5 & 10.0
			Historic Heritage Management Plan	9.0
			Social Impact Management Plan	4.3.3
	Management and Reporting of Incidents and Non Compliances	<p>WCPL will manage and report all environmental incidents at the Mine in accordance with WCPL's Incident Management Procedure and Pollution Incident Response Management Plan.</p> <p>All incidents that cause, or threaten to cause, material harm to the environment (as defined by law) will be reported in accordance with the PIRMP. All other incidents and non-compliances with the Impact Assessment Criteria will be reported to DPE and EPA, and any other relevant agencies as specified in the relevant management plan</p> <p>Within seven days of the date of a reportable incident or non-compliance, WCPL will provide a detailed report to the DPE and EPA in accordance</p>	Noise Management Plan	9.1
			Blast Management Plan	9.1
			Blast Fume Management Strategy	4.0
			Air Quality Management Plan	9.1
			Water Management Plan	9.1
			Aboriginal Cultural Heritage Management Plan	8.1

Element	Aspect	Commitment	Reference	EMP Section
		with the requirements of the Project Approval and EPL 12425. Where monitoring results show an exceedance of the relevant Impact Assessment Criteria, WCPL will notify affected landowners as specified in relevant management plan. If a non-compliance of any approval or licence condition is identified, WCPL will investigate the non-compliance and implement corrective actions as soon as required.	Historic Heritage Management Plan	5.2
			Social Impact Management Plan	6.1
	Community and Consultation	Internal and external communications are undertaken as described in Section 3.17 to ensure all relevant stakeholders are informed regularly (or as required).	Environmental Management Strategy	3.17
	Complaints Response	WCPL have implemented a Complaint Response Protocol to respond to all community concerns. WCPL will continue to operate a Community Information and community hotline (ph:1300 606 625) for the purpose of receiving complaints from members of the public in relation to mining activities at the Mine. Records of all complaints will be kept for at least four years. Records will be provided to any authorised officer who asks to see them.	Noise Management Plan	8.0
			Blast Management Plan	8.0
			Air Quality Management Plan	8.0
			Water Management Plan	5.0
			Aboriginal Cultural Heritage Management Plan	7.0
			Historic Heritage Management Plan	6.0
			Social Impact Management Plan	4.3.4
	Dispute Resolution	The dispute resolution process will be followed in the event of a disagreement between WCPL and a member of the community as described in the relevant EMP. Disputes in relation to the acquisition of property or property. Inspections/investigations (that cannot be resolved between WCPL and the affected resident) will be referred to the Secretary of DPE for resolution.	Noise Management Plan	4.3
			Blast Management Plan	4.6
			Air Quality Management Plan	4.6
	Document and Record Control	WCPL's maintains a document control system that accurately records, stores and enables retrieval of all necessary environmental documents and data. WCPL will maintain a copy of all monitoring results for at least four years. All records will be kept in a legible form. Records will be provided to any authorised officer if requested.	Noise Management Plan	6.6
			Blast Management Plan	6.4
			Air Quality Management Plan	6.6
			Water Management Plan	6.2

5 Review and Improvement

5.1 EMS Review

Within three months of the submission of:

- a) The Annual Review;
- b) A blast incident (exceedance) report;
- c) An Independent Environmental Audit;
- d) The approval of any modification to the conditions of this consent; and
- e) A direction of the Secretary.

WCPL will review, and if necessary revise, this EMS and/or any relevant EMP/s to the satisfaction of the Secretary.

WCPL will also review, and if necessary revise, this EMS and/or any relevant EMP/s when there are changes to the EPL and in response to a relevant change in technology, legislation, or operations.

WCPL will comply with any reasonable requirement/s of the Secretary arising from the Department's assessment of:

- a) Any reports, strategies, plans, programs, reviews, audits or correspondence that are submitted in accordance with the Development Consent (SSD-6764); and
- b) The implementation of any actions or measures contained in these documents.

Where the review of the EMS leads to a revision, then within 4 weeks of the review the revised EMS will be submitted to the Secretary for approval, unless otherwise agreed with the Secretary.

To ensure the strategies, plans and programs are updated on a regular basis, and incorporate any recommended measures to improve the environmental performance of the development, WCPL may submit revised strategies, plans or programs required under this Development Consent (SSD-66764) at any time. With the agreement of the Secretary, WCPL may also submit any strategy, plan or program required by this consent on a staged basis.

The Secretary may approve a revised strategy, plan or program required under this consent, or the staged submission of any of these documents, at any time. With the agreement of the Secretary, WCPL may prepare the revised or staged strategy, plan or program without undertaking consultation with all parties nominated under the applicable condition in this consent.

Notes:

- *While any strategy, plan or program may be submitted on a progressive basis, WCPL will need to ensure that the existing operations on site are covered by suitable strategies, plans or programs at all times.*
- *If the submission of any strategy, plan or program is to be staged, then the relevant strategy, plan or program must clearly describe the specific stage to which the strategy, plan or program applies, the relationship of this stage to any future stages, and the trigger for updating the strategy, plan or program.*
- *For the avoidance of doubt, existing approved management plans, strategies or monitoring programs for the Wilpinjong Coal Project will continue to apply until the approval of a similar plan, strategy or program under this consent.*

5.2 Independent Review Procedure

If an owner of privately-owned land considers the development to be exceeding the relevant criteria in Schedule 3 of Development Consent (SSD-6764), then he/she may ask the Secretary in writing for an independent review of the impacts of the development on his/her land.

If the Secretary is satisfied that an independent review is warranted, then within 2 months of the Secretary's decision then WCPL will:

- (a) Commission a suitably qualified, experienced and independent person, whose appointment has been approved by the Secretary, to:

- Consult with the landowner to determine his/her concerns;
 - Conduct monitoring to determine whether the development is complying with the relevant criteria in Schedule 3; and
 - If the development is not complying with these criteria, then identify the measures that could be implemented to ensure compliance with the relevant criteria; and
- (b) Give the Secretary and landowner a copy of the independent review.

Note: Where the independent review finds that the development is not complying with applicable criteria, the Department may take enforcement action under the EP&A Act to ensure compliance with the consent.

5.3 Audits and Inspections

WCPL will undertake both Independent Compliance Audits as required by Development Consent (SSD-6764) and internal environmental audits and inspections of the Mine site and mine owned lands to assess ongoing environmental performance and compliance with statutory approvals. Corrective or preventative actions will be tracked in SAP⁷ and implemented as required.

Within a year of commencing development under (SSD-6764), and every three years thereafter (unless the Secretary directs otherwise) WCPL will commission an Independent Environmental Audit (IEA) of the Mine. This audit will:

- a) Be conducted by a suitably qualified, experienced and independent team of experts whose appointment has been endorsed by the Director-General;
- b) Include consultation with the relevant agencies;
- c) Assess the environmental performance of the project and assess whether it is complying with the requirements in this approval and any relevant EPL or Mining Lease (including any assessment, plan or program required under these approvals);
- d) Review the adequacy of strategies, plans or programs required under the abovementioned approvals; and
- e) Recommend appropriate measures or actions to improve the environmental performance of the project, and/or any assessment, plan or program required under the abovementioned approvals; and
- f) Be conducted and reported to the satisfaction of the Secretary.

Within three months of commissioning this audit, or as otherwise agreed by the Secretary, WCPL will submit a copy of the audit report to the Secretary, together with its response to any recommendation contained in the audit report and a timetable for the implementation of these recommendations as required. WCPL must implement these recommendations, to the satisfaction of the Secretary.

A copy of the audit report (and WCPL's response to any recommendations) will be made publicly available on the WCPL website.

⁷ Systems Application Products (SAP) is computer system utilised by WCPL.

6 Reporting

The following external reporting will be undertaken by WCPL in accordance with the conditions of the Development Consent (SSD-6764), EPL 12425 and Mining Leases:

- Exceedance and Non-Compliance reporting;
- Annual Review;
- Independent Environmental Audit;
- EPL Annual Return; and
- Website updates.

6.1 Non-compliance Reporting

A non-compliance of the relevant performance criteria as identified in Schedule 3 of Development Consent (SSD-6764) will be notified immediately upon confirming the exceedance to DPE and EPA.

As soon as practicable after obtaining monitoring results showing an exceedance with any relevant criteria WCPL will notify affected landowners in writing of the exceedance and provide regular monitoring results to each affected landowner until the project is again complying with the relevant criteria.

Within seven days of the date of an exceedance, WCPL will provide a detailed report to the DPE, EPA and NSW Health (if its air quality related) that:

1. Describes the date, time, and nature of the exceedance or non-compliance;
2. Identifies the cause (or likely cause) of the exceedance or non-compliance;
3. Describes what action (**Section 6.2**) has been taken to date to remedy the exceedance or non-compliance; and
4. Describes the proposed measures (**Section 6.2**) to address the exceedance or non-compliance.

6.2 Adaptive Management

WCPL will assess and manage development-related risks to ensure that there are no exceedances⁸ of the criteria and/or performance measures in Schedule 3 of Development Consent (SSD67-64). Where any exceedance of these criteria and/or performance measures has occurred, the WCPL will, at the earliest opportunity:

- Take all reasonable and feasible steps to ensure that the exceedance ceases and does not recur;
- Consider all reasonable and feasible options for remediation (where relevant) and submit a report to the Department describing those options and any preferred remediation measures or other course of action; and
- Implement reasonable remediation measures as directed by the Secretary.

6.2.1 Pollution Incident Response Management Plan

WCPL have developed and implemented a Pollution Incident Response Management Plan (PIRMP), to ensure that operational activities at WCPL that have the potential to cause harm or pose a threat to the environment are clearly identified and that adequate response processes are identified and implemented in the event of an incident.

The PIRMP was developed to meet WCPL's obligations under *Part 5.7A of the Protection of the Environment Operations Act 1997 (POEO Act) and Chapter 7, Part 3A of the Protection of the Environment Operations (General) Regulation 2009 (POEO(G) Regulation)*.

⁸ Any exceedance of these criteria and/or performance measures constitutes a breach of this consent and may be subject to penalty or offence provisions under the EP&A Act or EP&A Regulation.

If a Pollution Incident occurs in the course of an activity at the Mine so that material harm to the environment is caused or threatened (i.e. likely to be caused), WCPL will immediately implement the PIRMP (refer to Section 1.1 of the PIRMP as to the meaning of Pollution Incident).

All Pollution Incidents are to be immediately notified in accordance with the Pollution Incident Response Process. To determine whether material harm to the environment has been caused or threatened, WCPL will immediately notify the incident in accordance with Pollution Incident Response Process in Figure 4 of the PIRMP.

6.3 Annual Review

At the end of March each year, WCPL will review the environmental performance of the Mine and submit an Annual Review report to the DPE. This report will:

- a) Describe the development (including any rehabilitation) that was carried out in the past year, and the development that is proposed to be carried out over the next year;
- b) Include a comprehensive review of the monitoring results and complaints records of the project over the past year, which includes a comparison of these results against the:
 - Relevant statutory requirements, limits or performance measures/criteria;
 - Monitoring results of previous years; and
 - Relevant predictions in the EIS⁹;
- c) Identifying any exceedance over the last year, and describe what was the extrinsic cause(s);
- d) Identify any non-compliance over the last year, and describe what actions were (or are being) taken to ensure compliance;
- e) Identify any trends in the monitoring data over the life of the project;
- f) Identify any discrepancies between the predicted and actual impacts of the project, and analyse the potential cause of any significant discrepancies; and
- g) Describe what measures will be implemented over the next year to improve the environmental performance of the project.

A copy of the Annual Review will be made publicly available on the WCPL website.

6.4 EPL Reporting

WCPL will prepare and submit an Annual Return comprising a certified Statement of Compliance and a signed Monitoring and Complaints Summary to the EPA at the end of each EPL reporting period. The Annual Return for the reporting period will be supplied to the EPA by registered post not later than 60 days after the end of each reporting period. WCPL will retain a copy of the Annual Return for a period of at least four years after the Annual return was due to be supplied to the EPA.

6.5 Access to Information

From the commencement of development under this Development Consent (SSD-6764), WCPL will ensure that any information relevant to this EMS and relevant EMPs is uploaded to the website (and kept up to date). This includes:

- (a) Make copies of the following information publicly available on its website:
 - The WEP EIS;
 - Current statutory approvals for the development;
 - Approved strategies, plans or programs required under the conditions of this consent;
 - A comprehensive summary of the monitoring results of the development, reported in accordance with the specifications in any conditions of this consent, or any approved plans and programs;
 - A complaints register, which is to be updated monthly;
 - Minutes of CCC meetings;

⁹ EIS 2015 for the Wilpinjong Extension Project (WEP)

- The last five annual reviews;
 - Any independent environmental audit, and the Applicant's response to the recommendations in any audit;
 - Any other matter required by the Secretary; and
- (b) Keep this information up to date.

7 Responsibilities

Table 8 lists the key responsibilities of personnel under this EMS. Additional responsibilities for environmental management are listed in the relevant EMP's.

Table 8 Environmental Management Strategy Responsibilities

Responsibility	Task	Timing
General Manager	Ensure that adequate resources are available to effectively implement requirements of this EMS and EMPs.	Ongoing and during budget planning
	Participate in Dispute Resolution process as required	As required
Senior Leadership Team	Support the Environmental Department in the effective implementation of this EMS and EMPs.	At all times
	Develop and review Annual Business Plan, LOM Plan and Mine Closure Plan.	Annually
	Participate in Environment and Community Broad Brush Risk Assessment	Annually
Environment and Community Manager (ECM)	Ensure that all employees and contractors are given adequate training in the EMS, environmental and cultural awareness and legal responsibilities.	Within 3 months of approval of this EMS, and as required
	Undertake internal and external communication and consultation.	As required
	Ensure that all incidents are entered into PIMS (or PCAT) and corrective actions assigned	Following an incident
	Notify immediately DPE and EPA (and other relevant regulatory authorities) of any incidents or non-compliances as required by Section 6.0 .	In accordance with this EMS, Development Consent (SSD67-64) and EPL
	Ensure that all regulatory reporting is undertaken in relation to this EMS and EMPs.	As required
	Ensure that all complaints are responded to in accordance with the Complaints Response Protocol	Following a complaint
	Participate in Dispute Resolution Process as required.	As required
	Coordinate relevant reviews of this EMS and the EMPs in accordance with Section 5	As required
	Ensure audits are undertaken as required, in accordance with Section 5.3	As required
	Commission a suitably qualified, experienced and independent expert to undertake an independent review of mine impacts on affected landowners, if requested by the Secretary, as per Section 5.2	When requested by the Secretary of DPE
	Drive continuous improvement for the Mine.	As required
	Review the performance of the monitoring programs and effectiveness of this EMS and EMPs.	As required
	Coordinate emergency response for environmental incidents, in accordance with PIRMP.	Immediately following an incident
	Environmental Representative	Maintain the environmental monitoring and management systems
Ensure monitoring is undertaken in accordance with the monitoring programs detailed in the respective EMPs.		As required
Regularly review monitoring data to ensure compliance with relevant Development Consent (SSD-6764) assessment Criteria as outlined in Schedule 3.		As required
Ensure all records relating to the EMS are managed in accordance with the EPL.		As required

Responsibility	Task	Timing
	Prepare all statutory reports relating to this EMS and EMPs.	As required
	Report on Continuous Improvement opportunities in the Annual Review when identified.	Annually (Annual Review)
	Ensure the WCPL website is maintained in accordance with Condition 12 of Schedule 5 of Development Consent (SSD67-64)	As required
	Maintain all machinery and plant used on site in a proper and efficient condition	As required
Maintenance Manager	Operate all machinery and plant used on site in a proper and efficient manner	As required
All employees and contractors	Report all incidents to Environmental Department as soon as practicable	As soon as practicable

9 Appendices

9.1 Appendix 1: Environmental Management Strategy Requirements

Schedule 2 of Development Consent (SSD-6764)

Approval/ Licence	Condition	Requirement	Section
Development Consent	Schedule 2 Condition 1	In addition to meeting the specific performance criteria established under this consent, the Applicant must implement all reasonable and feasible measures to prevent and/or minimise any material harm to the environment that may result from the construction, operation, or rehabilitation of the development.	4
Development Consent	Schedule 2 Condition 2	The Applicant must carry out the development: (a) generally in accordance with the EIS and the Wilpinjong Coal Project EIS; and (b) in accordance with the conditions of this consent. <i>Note: The general layout of the development is shown in Appendix 2.</i>	3.1
Development Consent	Schedule 2 Condition 3	If there is any inconsistency between documents listed in condition 2(a) above, the most recent document shall prevail to the extent of the inconsistency. However, the conditions of this consent shall prevail to the extent of any inconsistency.	3.1
Development Consent	Schedule 2 Condition 4	The Applicant must comply with any reasonable requirement/s of the Secretary arising from the Department's assessment of: (a) any strategies, plans, programs, reviews, reports, audits or correspondence that are submitted in accordance with this consent (including any stages of these documents); (b) any reviews, reports or audits commissioned by the Department regarding compliance with this consent; and (c) the implementation of any actions or measures contained in these documents.	5.1
Development Consent	Schedule 2 Condition 9	Within 6 months of the commencement of development under this consent, or as otherwise agreed by the Secretary, the Applicant must surrender the existing project approval (MP 05-0021) for the Wilpinjong Coal Project in accordance with Section 8P of the EP&A Regulation. Following the commencement of development under this consent, and prior to the surrender of the project approval (MP 05-0021), the conditions of this consent shall prevail to the extent of any inconsistency with the conditions of MP 05-0021. <i>Notes:</i> <ul style="list-style-type: none"> <input type="checkbox"/> Any existing management and monitoring plans/strategies/programs/protocols/committees under the existing approval for the Wilpinjong Coal Project will continue to apply until the approval of the comparable plan/strategy/program/protocol/committee under this consent. <input type="checkbox"/> This requirement does not extend to the surrender of construction and occupation certificates for existing and proposed building works under Part 4A of the EP&A Act. Surrender of a consent should not be understood as implying that works legally constructed under a valid consent can no longer be legally maintained or used. 	3.0

Approval/ Licence	Condition	Requirement	Section
Development Consent	Schedule 2 Condition 13	The Applicant must ensure that all plant and equipment used on site, or to monitor the performance of the development, is: (a) maintained in a proper and efficient condition; and (b) operated in a proper and efficient manner.	7

Schedule 3 of Development Consent (SSD-6764)

Approval/ Licence	Condition	Requirement	Section
Development Consent	Schedule 3 Condition 55	The Applicant must make contributions towards the implementation of the Ulan Road Strategy (ARRB Group, December 2011). If there is any dispute about the implementation of the strategy, then any of the parties involved may refer the matter to the Secretary for resolution	3.12
Development Consent	Schedule 3 Condition 56	Prior to carrying out any development under this consent, the Applicant shall write to the owners of the residences that are entitled to additional road noise mitigation works under the Ulan Road Strategy (ARRB Group, December 2011) who have not sought these mitigation measures yet, and remind them that they are entitled to additional road noise mitigation works under the strategy.	3.12
Development Consent	Schedule 3 Condition 52	The Applicant must: a) Schedule shift changes on site to occur outside of school bus hours; and b) co-ordinate the shift changes on site with the shift changes of the adjoining Moolarben and Ulan mines to minimise the potential cumulative traffic impacts of shift changes of the three mines.	3.13

Schedule 4 of Development Consent (SSD-6764)

Approval/ Licence	Condition	Requirement	Section
Development Consent	Schedule 4 Condition 3	As soon as practicable after obtaining monitoring results showing: (a) an exceedance of any relevant criteria in schedule 3, the Applicant must notify affected landowners in writing of the exceedance, and provide regular monitoring results to each affected landowner until the development is again complying with the relevant criteria; and (b) an exceedance of the relevant air quality criteria in schedule 3, the Applicant must send a copy of the NSW Health fact sheet entitled "Mine Dust and You" (as may be updated from time to time) to the affected landowners and/or existing tenants of the land (including the tenants of any mine-owned land).	4
Development Consent	Schedule 4 Condition 4	If an owner of privately-owned land considers the development to be exceeding the relevant criteria in schedule 3, then he/she may ask the Secretary in writing for an independent review of the impacts of the development on his/her land. If the Secretary is satisfied that an independent review is warranted, then within 2 months of the Secretary's decision the Applicant must:	5.2

Approval/ Licence	Condition	Requirement	Section
		<p>(a) commission a suitably qualified, experienced and independent person, whose appointment has been approved by the Secretary, to:</p> <ul style="list-style-type: none"> • consult with the landowner to determine his/her concerns; • conduct monitoring to determine whether the development is complying with the relevant criteria in schedule 3; and • if the development is not complying with these criteria, then identify the measures that could be implemented to ensure compliance with the relevant criteria; and <p>(b) give the Secretary and landowner a copy of the independent review.</p> <p><i>Note: Where the independent review finds that the development is not complying with applicable criteria, the Department may take enforcement action under the EP&A Act to ensure compliance with the consent.</i></p>	

Schedule 5 of Development Consent (SSD-6764)

Approval/ Licence	Condition	Requirement	Section
Development Consent	Schedule 5 Condition 2	<p>The Applicant must assess and manage development-related risks to ensure that there are no exceedances of the criteria and/or performance measures in schedule 3. Any exceedance of these criteria and/or performance measures constitutes a breach of this consent and may be subject to penalty or offence provisions under the EP&A Act or EP&A Regulation.</p> <p>Where any exceedance of these criteria and/or performance measures has occurred, the Applicant must, at the earliest opportunity:</p> <p>(a) take all reasonable and feasible steps to ensure that the exceedance ceases and does not recur;</p> <p>(b) consider all reasonable and feasible options for remediation (where relevant) and submit a report to the Department describing those options and any preferred remediation measures or other course of action; and</p> <p>(c) implement reasonable remediation measures as directed by the Secretary.</p>	3.5, 3.6, 4 and 6.2
Development Consent	Schedule 5 Condition 4	<p>By the end of March each year, the Applicant must submit a review of the environmental performance of the development for the previous calendar year to the satisfaction of the Secretary. This review must:</p> <p>(a) describe the development (including any rehabilitation) that was carried out in the past year, and the development that is proposed to be carried out over the next year;</p> <p>(b) include a comprehensive review of the monitoring results and complaints records of the development over the past year, which includes a comparison of these results against the:</p> <ul style="list-style-type: none"> • relevant statutory requirements, limits or performance measures/criteria; • monitoring results of previous years; and • relevant predictions in the EIS; <p>(c) identify any non-compliance over the last year, and describe what actions were (or are being) taken to ensure compliance;</p> <p>(d) identify any trends in the monitoring data over the life of the development;</p> <p>(e) identify any discrepancies between the predicted and actual impacts of the development, and analyse the potential cause of any significant discrepancies; and</p> <p>(f) describe what measures will be implemented over the next year to improve the environmental performance of the development.</p>	6.3

Approval/ Licence	Condition	Requirement	Section
		<p>Note: The “Post Approval Requirements for State Significant Developments - Annual Review Guideline 2015, NSW Government, October 2015” (or its latest version) provides a reporting framework to integrate the reporting requirements of the Annual Review required by the Department under the development consent and the Annual Environment Management Report (AEMR) required under the Mining Lease.</p>	
Development Consent	Schedule 5 Condition 5	<p>Within 3 months of:</p> <ul style="list-style-type: none"> (a) the submission of an annual review under condition 4 above; (b) the submission of an incident report under condition 8 below; (c) the submission of an audit under condition 10 below; and (d) the approval of any modification to the conditions of this consent; or (e) a direction of the Secretary under condition 4 of schedule 2; <p>the Applicant must review, and if necessary revise, the strategies, plans, and programs required under this consent to the satisfaction of the Secretary.</p> <p>Where this review leads to revisions in any such document, then within 4 weeks of the review the revised document must be submitted to the Secretary for approval, unless otherwise agreed with the Secretary.</p> <p><i>Note: This is to ensure the strategies, plans and programs are updated on a regular basis, and incorporate any recommended measures to improve the environmental performance of the development.</i></p>	5.1
Development Consent	Schedule 5 Condition 6	<p>To ensure the strategies, plans and programs are updated on a regular basis, and incorporate any recommended measures to improve the environmental performance of the development, the Applicant may submit revised strategies, plans or programs required under this consent at any time. With the agreement of the Secretary, the Applicant may also submit any strategy, plan or program required by this consent on a staged basis.</p> <p>The Secretary may approve a revised strategy, plan or program required under this consent, or the staged submission of any of these documents, at any time. With the agreement of the Secretary, the Applicant may prepare the revised or staged strategy, plan or program without undertaking consultation with all parties nominated under the applicable condition in this consent.</p> <p>Notes:</p> <ul style="list-style-type: none"> • <i>While any strategy, plan or program may be submitted on a progressive basis, the Applicant will need to ensure that the existing operations on site are covered by suitable strategies, plans or programs at all times.</i> • <i>If the submission of any strategy, plan or program is to be staged, then the relevant strategy, plan or program must clearly describe the specific stage to which the strategy, plan or program applies, the relationship of this stage to any future stages, and the trigger for updating the strategy, plan or program.</i> • <i>For the avoidance of doubt, existing approved management plans, strategies or monitoring programs for the Wilpinjong Coal Project will continue to apply until the approval of a similar plan, strategy or program under this consent (see condition 9 of schedule 2).</i> 	5.0

Approval/ Licence	Condition	Requirement	Section
Development Consent	Schedule 5 Condition 7	<p>The Applicant must operate a Community Consultative Committee (CCC) for the project to the satisfaction of the Secretary. This CCC must be established and operated in general accordance with the Guidelines for Establishing and Operating Community Consultative Committees for Mining Projects (Department of Planning, 2007, or its latest version).</p> <p>Notes: The CCC is an advisory committee. The Department and other relevant agencies are responsible for ensuring that the Applicant complies with this consent; and</p> <p>The CCC should be comprised of an independent chair and appropriate representation from the Proponent, Council, recognised environmental groups and the local community.</p>	3.17.2
Development Consent	Schedule 5 Condition 8	The Applicant must immediately notify the Secretary and any other relevant agencies of any incident. Within 7 days of the date of the incident, the Applicant must provide the Secretary and any relevant agencies with a detailed report on the incident, and such further reports as may be requested.	6.1
Development Consent	Schedule 5 Condition 9	The Applicant must provide regular reporting on the environmental performance of the development on its website, in accordance with the reporting arrangements in any plans or programs approved under the conditions of this consent.	4, 6
Development Consent	Schedule 5 Condition 10	<p>Within a year of commencing development under this consent, and every 3 years thereafter, unless the Secretary directs otherwise, the Applicant must commission and pay the full cost of an Independent Environmental Audit of the development. This audit must:</p> <p>(a) be conducted by a suitably qualified lead auditor and suitably qualified, experienced and independent team of experts in any field specified by the Secretary, whose appointment has been endorsed by the Secretary;</p> <p>(b) include consultation with the relevant agencies;</p> <p>(c) assess the environmental performance of the development and assess whether it is complying with the requirements in this consent and any relevant EPL or Mining Lease (including any assessment, plan or program required under these approvals);</p> <p>(d) review the adequacy of strategies, plans or programs required under the abovementioned approvals;</p> <p>(e) recommend appropriate measures or actions to improve the environmental performance of the development, and/or any strategy, plan or program required under the abovementioned approvals; and</p> <p>(f) be conducted and reported to the satisfaction of the Secretary.</p> <p><i>Note: The "Post Approval Requirements for State Significant Developments - Independent Audit Guideline, NSW Government, October 2015" (or its latest version) provides an audit and reporting framework for the independent audit that will guide compliance with this condition.</i></p>	5.3
Development Consent	Schedule 5 Condition 11	Within 3 months of commissioning this audit, or as otherwise agreed by the Secretary, the Applicant must submit a copy of the audit report to the Secretary, together with its response to any recommendations contained in the audit report, and a timetable for the implementation of these recommendations as required. The Applicant must implement these recommendations, to the satisfaction of the Secretary.	5.3
Development Consent	Schedule 5 Condition 12	<p>From the commencement of development under this consent, the Applicant shall:</p> <p>(a) Make copies of the following information publicly available on its website:</p> <ul style="list-style-type: none"> • the EIS; • current statutory approvals for the development; 	6.5

Approval/ Licence	Condition	Requirement	Section
		<ul style="list-style-type: none"> • approved strategies, plans or programs required under the conditions of this consent; • a comprehensive summary of the monitoring results of the development, reported in accordance with the specifications in any conditions of this consent, or any approved plans and programs; • a complaints register, which is to be updated monthly; • minutes of CCC meetings; • the last five annual reviews; • any independent environmental audit, and the Applicant's response to the recommendations in any audit; • any other matter required by the Secretary; and <p>(b) keep this information up to date.</p>	

Environmental Protection Licence (EPL)

Approval/ Licence	Condition	Requirement	Section
EPL	O2.1	All plant and equipment installed at the premises or used in connection with the licensed activity: a) must be maintained in a proper and efficient condition; and b) must be operated in a proper and efficient manner.	7
	M1.2	All records required to be kept by this licence must be: a) in a legible form, or in a form that can readily be reduced to a legible form; b) kept for at least 4 years after the monitoring or event to which they relate took place; and c) produced in a legible form to any authorised officer who asks to see them.	3, 4, 6 and 7
	M1.3	The following records must be kept in respect of any samples required to be collected for the purposes of this licence: a) the date(s) on which the sample was taken; b) the time(s) at which the sample was collected; c) the point at which the sample was taken; and d) the name of the person who collected the sample.	
	M5.1	The licensee must keep a legible record of all complaints made to the licensee or any employee or agent of the licensee in relation to pollution arising from any activity to which this licence applies.	4
	M5.2	The record must include details of the following: a) the date and time of the complaint; b) the method by which the complaint was made; c) any personal details of the complainant which were provided by the complainant or, if no such details were provided, a note to that effect; d) the nature of the complaint; e) the action taken by the licensee in relation to the complaint, including any follow-up contact with the complainant; and f) if no action was taken by the licensee, the reasons why no action was taken.	4
	M5.3	The record of a complaint must be kept for at least 4 years after the complaint was made.	4
	M5.4	The record must be produced to any authorised officer who asks to see them.	4
	M6.1	The licensee must operate during its operating hours a telephone complaints line for the purpose of receiving any complaints from members of the public in relation to activities conducted at the premises or by the vehicle or mobile plant, unless otherwise specified in the licence.	4
	M6.2	The licensee must notify the public of the complaints line telephone number and the fact that it is a complaints line so that the impacted community knows how to make a complaint.	4
	R1.1	The licensee must complete and supply to the EPA an Annual Return in the approved form comprising: 1. a Statement of Compliance; 2. a Monitoring and Complaints Summary, 3. a Statement of Compliance - Licence Conditions, 4. a Statement of Compliance - Load based Fee,	4

Approval/ Licence	Condition	Requirement	Section
		5. a Statement of Compliance - Requirement to Prepare Pollution Incident Response Management Plan, 6. a Statement of Compliance - Requirement to Publish Pollution Monitoring Data; and 7. a Statement of Compliance - Environmental Management Systems and Practices. At the end of each reporting period, the EPA will provide to the licensee notification that the Annual Return is due.	
EPL	R1.2	An Annual Return must be prepared in respect of each reporting period, except as provided below.	6
	R1.5	The Annual Return for the reporting period must be supplied to the EPA via eConnect EPA or by registered post not later than 60 days after the end of each reporting period or in the case of a transferring licence not later than 60 days after the date the transfer was granted (the 'due date').	6
	R1.6	The licensee must retain a copy of the Annual Return supplied to the EPA for a period of at least 4 years after the Annual Return was due to be supplied to the EPA	6
	R1.7	Within the Annual Return, the Statement of Compliance must be certified and the Monitoring and Complaints Summary must be signed by: a) the licence holder; or b) by a person approved in writing by the EPA to sign on behalf of the licence holder. Note: The term "reporting period" is defined in the dictionary at the end of this licence. Do not complete the Annual Return until after the end of the reporting period.	6
	R2.1	Notifications must be made by telephoning the Environment Line service on 131 555.	6
	R2.2	The licensee must provide written details of the notification to the EPA within 7 days of the date on which the incident occurred. Note: The licensee or its employees must notify all relevant authorities of incidents causing or threatening material harm to the environment immediately after the person becomes aware of the incident in accordance with the requirements of Part 5.7 of the Act.	6

Department of Planning and Environment

Our ref: SSD-6764-PA-66

Kieren Bennetts
Environment and Community Manager-Wilpinjong Coal
1434 Ulan-Wollar Road
Wilpinjong, NSW 2850

14 July 2022

Subject: Environmental Management Strategy for Wilpinjong Coal Mine Extension (SSD-6764)

Dear Mr Bennetts

I refer to the revised Environmental Management Strategy which was submitted in accordance with Condition 1 of Schedule 5 of the Development Consent for the Wilpinjong Coal Mine Extension (SSD-6764).

The Department has carefully reviewed the document and is satisfied that it meets the requirements of the relevant conditions of consent. Accordingly, the Secretary has approved the Environmental Management Strategy (Version 9, dated June 2022), subject to revising the document to ensure all agency names are up to date throughout the document (e.g. DPE rather than DPIE).

Please ensure you make the approved strategy publicly available on the company's website.

If you wish to discuss the matter further, please contact Nima Salek on 292746088 or via email at nima.salek@dpie.nsw.gov.au.

Yours sincerely

Stephen O'Donoghue

09/05/2022

Dear Mr. Flood

**Wilpinjong Coal Mine Extension (SSD-6764)
Environmental Management Strategy**

I refer to the Environmental Management Strategy which was submitted in accordance with Condition 1 of Schedule 5 of the Development Consent for the Wilpinjong Coal Mine Extension (SSD-6764).

The Department has carefully reviewed the document and is satisfied that it meets the requirements of the relevant conditions of consent.

Accordingly, the Secretary has approved the Environmental Management Strategy (Version 8, dated June 2021). Please ensure that the approved plan is placed on the project website at the earliest convenience.

If you wish to discuss the matter further, please contact Wayne Jones on (02) 6575 3406.

Yours sincerely

07/09/2020

Dear Mr Bennetts

**Wilpinjong Coal Mine Extension (SSD-6764-PA-12)
Various Management Plans**

I refer to the various management plan submitted in accordance with Development Consent for the Wilpinjong Coal Mine Extension (SSD-6764).

The Department has carefully reviewed these documents and is satisfied some of these management plans meet the requirements of the relevant Conditions of Consent.

Accordingly, the Planning Secretary has approved the following documents:

- Blast Management Plan (Version 7, dated August 2020) - Schedule 3 Condition 14
- Blast Fume Management Plan (Version 4, dated August 2020) - Schedule 3 Condition 14
- Biodiversity Management Plan (Version 6, dated August 2020) - Schedule 3 Condition 42
- Noise Management Plan (Version 5, dated August 2020) - Schedule 3 Condition 5
- Spontaneous Combustion Management Plan (Version 6, dated August 2020) - Schedule 3 Condition 20
- Air Quality Management Plan (Version 6, dated August 2020) - Schedule 3 Condition 20
- Environmental Management Strategy (Version 7, dated August 2020) - Schedule 5 Condition 1

Given proposed revisions the following management plans should be resubmitted individually, and consultation undertaken with the appropriate sections of NSW Heritage, either prior to submission, or via the Major Projects portal:

- Historic Heritage Management Plan
- Aboriginal Cultural Heritage Management Plan

Given proposed revisions to groundwater monitoring network, clean water diversions and water balance variations, the following management plans should be provided as one submission following consultation undertaken with DPIE Water and NRAR, either prior to submission, or via the Major Projects portal:

- Water Management Plan
- Groundwater Management Plan
- Surface Water Management Plan
- Site Water Balance

Please ensure that these approved plans are placed on the project website at the earliest convenience.

In future please provide each management plan as a separate submission via the Major Projects portal to allow review and approval.

If you wish to discuss the matter further, please contact Wayne Jones on 6575 3406.

Yours sincerely

Stephen O'Donoghue

Dear Mr Flood

**Wilpinjong Coal Mine (SSD-6764)
Management Plan Review**

I refer to your emails dated 27 September 2019 and 17 April 2020 submitting revised management plans for the Wilpinjong Coal Mine (SSD-6764), including the:

- Aboriginal and Cultural Heritage Management Plan (condition 47 of Schedule 3, version 6 dated September 2019);
- Air Quality Management Plan (condition 20 of Schedule 3, version 5 dated September 2019);
- Biodiversity Management Plan (condition 42 of Schedule 3, version 6 dated September 2019);
- Blast Management Plan (condition 14 of Schedule 3, version 6 dated September 2019);
- Environmental Management Strategy (condition 1 of Schedule 5, version 6 dated September 2019);
- Historical Heritage Management Plan (condition 49 of Schedule 3, version 3 dated September 2019); and
- Noise Management Plan (condition 5 of Schedule 3, version 4 dated September 2019).

The Department has reviewed the above plans and is satisfied that they meet the requirements of the relevant conditions of consent. Accordingly, the Secretary has approved these plans.

I also refer to the revised Water Management Plan which was submitted on 17 April 2020. The Department notes that substantial changes have been made to the site water balance component of this plan.

As such, the Department requests that this plan be submitted through the Major Projects portal for review by the Department and relevant agencies.

If you have any questions, please contact Jack Turner on 02 9995 5387 or Jack.Turner@planning.nsw.gov.au

Yours sincerely

Mr Ian Flood
Manager Project Development & Approvals –
Peabody Energy
Wilpinjong Extension Project

By email to: IFlood@peabodyenergy.com

Dear Mr Flood

**Wilpinjong Extension Project (SSD-6764)
Approval of Environmental Management Plans**

I refer to the management plans submitted to the Department, seeking the Secretary's review and approval for the Wilpinjong Extension Project (WEP).

The Department has completed a detailed review of the management plans, which were subsequently revised to address the Department's comments including the:

- Noise Management Plan (Version 3, dated August 2017);
- Air Quality Management Plan (Version 3, dated August 2017);
- Blast Management Plan (Version 3, dated August 2017);
- Historic Heritage Management Plan (Version 3, dated August 2017);
- Aboriginal Cultural Heritage Management Plan (Version 3, dated August 2017);
- Biodiversity Management Plan (Version 3, dated August 2017); and
- Environmental Management Strategy (Version 3, dated August 2017).

As part of its review, the Department also considered Peabody's request to submit the Historic Heritage Management Plan on a staged basis in accordance with Condition 6, Schedule 5 of the WEP Development Consent (SSD-9794).

The Department is satisfied that the proposed staging of the Historic Heritage Management Plan, as described in Section 1.4 of the HHMP, is reasonable and that the plans have been prepared in consultation with the relevant agencies and address the requirements of Conditions 5, 14, 20, 42, 47 and 49, in Schedule 2 and Condition 1, in Schedule 5 of SSD-9794. Accordingly, the Secretary approves the revised management plans.

Please ensure that all new monitoring sites proposed for the WEP, where establishment dates have not been nominated with the respective management plan are established within 60 days of the date of this letter and that a copy of the approved plans is placed on your website as soon as possible following the commencement of the WEP.

If you require further information, please contact Stephen Shoesmith on 9274 6164

Yours sincerely

Dear Mr Bennetts

Wilpinjong Coal Mine (05_0021) Management Plans

I refer to the revised management plans submitted to the Department following approval of the recent modification application for the Wilpinjong Coal Project (05_0021).

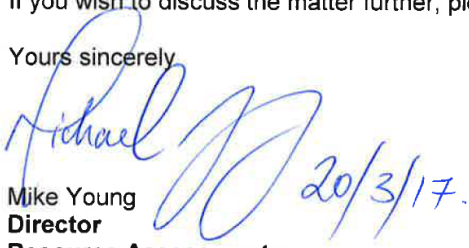

The Department has reviewed the management plans and is satisfied that the following plans are adequate:

- Noise Management Plan;
- Blast Management Plan;
- Air Quality Management Plan;
- Site Water Management Plan;
- Biodiversity Management Plan;
- Aboriginal Cultural Heritage Management Plan;
- Waste Management Plan;
- Spontaneous Combustion Management Plan; and
- Environmental Management Strategy.

Consequently, the Secretary approves the above mentioned plans.

If you wish to discuss the matter further, please contact Matthew Riley on 9274 6339.

Kieren Bennetts –
Environment and Community Manager
Wilpinjong Coal Mine
Peabody Energy Australia
Locked Bag 2005
Mudgee NSW 2850

Dear Mr Bennetts

**Wilpinjong Coal – PA 05_0021
Environmental Management Strategy**

I refer to the revised *Wilpinjong Coal Environmental Management Strategy* (EMS), May 2016 (WI-ENV-MNP-0001) received by the Department via email dated 27 May 2016.

The Department has reviewed the revised EMS and is satisfied that it generally addresses the requirements set out in Schedule 5 Condition 1 of PA 05_0021 (as modified). Accordingly the Secretary has approved the EMS.

The Department acknowledges that the EMS has been written with consideration of the previously provided review comments by the Department issued for the previous revision.

The following comments are provided on the document submitted:

- a) Table 5 – as per the comments provided for the previous revision, it was suggested that any reference to ‘*authorised EPA officer*’ should be changed to include authorised officer only, and not restrict it to the EPA. Under the element of *Implementation* and aspect of *Document and Record Control*, update the commitment accordingly;
- b) Table 5 – it is suggested that the commitment for the element of *Measurement and Evaluation* and aspect of *Environmental Measurement Monitoring* is updated to indicate that Appendix 2 contains environmental monitoring location plans, rather than environmental monitoring requirements. In addition, it should be noted that Appendix 2 does not include a plan for the blast monitoring locations or a plan for Aboriginal heritage (it is assumed that the latter may be due to the potential sensitivity of the information and therefore a statement to this effect should be included);
- c) the table of contents should be updated to include page numbering; and
- d) the listed appendices in the table of contents do not correlate with the numbering of the actual appendices. The table of contents titles are to match the titles of the appendices and any cross-referencing throughout the document is to be accurate and consistent.

It is requested that the issues raised in points a) to d) are addressed either prior to the publishing of the EMS on the website or in the next revision of the document.

A copy of the EMS is to be placed on the website in accordance with Schedule 5 Condition 11 of the approval within one month of the date of this letter.

Should you wish to discuss the above matter, please contact me on 02 4224 9478 or Christopher.Schultz@planning.nsw.gov.au.

Yours sincerely

Chris Schultz
Acting Team Leader Compliance Southern Region
as nominee of the Secretary
