

Metropolitan Mine

QUICK FACTS

MINE TYPE
Underground

LOCATION
Helensburgh, NSW

COAL TYPE
Metallurgical

MINING METHOD
Longwall

DID YOU KNOW?

One of the oldest continually operating coal mining operations in Australia, the Metropolitan Coal has been an integral part of the Helensburgh community for 130 years and is a major contributor to the of the region.

Metropolitan uses underground longwall mining techniques to extract the coal which is then transferred by conveyor to the major surface facilities area. The coal is transported by train to the Port Kembla Coal Terminal for shipping to domestic and overseas customers.

The mine also actively engages with the community through its Community Consultative Committee.
