

## Coal Mining

Coal is an essential part of the world's energy mix and a key ingredient in steelmaking.

## Land Reclamation

Reclaiming the land for future generations is an integral part of the mining process.

## Coal Plants & Steel Mills

Coal is used to generate electricity and is one of the building blocks for steel, which supports growing and healthy economies.

# Coal: Essential in Energy & Steel

At Peabody, the lifecycle of coal means a commitment to sustainable mining practices, building recognition of coal's essential role in electricity generation and steel making, and encouraging greater development and deployment of advanced coal technologies - what we refer to as "Coal Done Right." Peabody believes safety should be at the forefront of all components of the coal lifecycle, and we commit to safety and health as a way of life.

## Transportation

Coal is transported by land and by sea to electricity generating plants and steel mills.

## Coal in Use

Every day we experience the benefits of coal, from lights and cell phones, to steel bridges and buildings.
